Charts

Analysis Tools · https://arba.app/userguide/charts/

You can see three periods:

- YTD - current year from January 1st to December 31st
- 1Y - last 12 months
- ALL - all history

Below the chart is a table that shows the total mileage for the selected period. Click on the column on the chart (one column - one month) and the table will display the mileage value for the selected month.

The chart supports gestures and can be stretched and resized.

Click the "Compare" button at the bottom of the screen to add the mileage of other cars to the chart. You can compare up to 3 cars on one chart. You can set different years for the selected cars. For example, you can compare the mileage or expenses of car A in 2020 with the mileage or expenses of car B in 2021. You can also view the same car in different years. In this case, it is necessary to select the YTD period on the chart.
