Expense and Income Reports

Expense and Income Tracking · https://arba.app/userguide/expense_reports/

The ARBA Auto app calculates a number of indicators.

In the dashboard in the "Reports" tab you will find the calculation of the amount of expenses for the selected month / year / or the entire period of ownership, as well as the cost of 1 km or a mile.

If you track earnings, you will see profit or loss for the specified periods.

Click on the "Expenses" line to navigate to the charts. The chart displays the following indicators:

- Monthly expenses
- Average daily expenses
- Cost per kilometer (mile)
- Idle cost per day

You can view these figures for each expense category using the appropriate filter, add vehicles for comparison, and view the chart in foreign currency terms.
