Offline Mode

Data Import and Export · https://arba.app/userguide/offline_mode/

For normal operation, the app needs an Internet connection. However, the application allows you to enter data into the "Timeline" feed even if there is no connection at all. Expenses, income, refueling and charging. This can be convenient if you have turned off the mobile Internet while roaming or there is simply no connection at remote gas stations. In offline mode, the functionality of the application will be limited. In particular, there will be no conversion of exchange rates, forecast calculation and statistics will not be updated in the "Reports" tab. As soon as the connection is restored, the application will synchronize data automatically. If you experience problems, start data synchronization manually.
