Paid Extensions

Getting Started · https://arba.app/userguide/paid_extensions/

In the "Extensions" tab, you can activate additional features with a one-time purchase that you will have forever. This is not a subscription, but a one-time payment.

Each vehicle can have its own set of extensions activated.

Your in-app purchases could be considered a reimbursable expense, as you can transfer the history to the new owner when you sell your car in the future. Include your application costs in the sale price of the vehicle.

"Premium"

- Income accounting;
- Comparison of vehicles in reports;
- Creating your own subcategories;
- Select a location on the map in the refueling, recharging, expenses and income forms;
- Data export;
- Transferring the vehicle to another user.

"Currency"

- Currency quotes: EUR, USD, AED, AUD, BYN, CAD, CHF, GBR, KZT, MDL, NZD, RUB, SAR, UAH.
- Registration of income and expenses in foreign currency;
- Dashboard and charts with foreign currency conversion.
